

Make a fingermouse to climb the clock!

You will need

Some white paper(this sheet printed)

Sticky tape or glue

Crayons or paint to colour your mouse

Cut out these shapes. Colour your mouse.

Roll the body into a cone and stick with tape or glue.

Now you can see the mouse body, stick on the ears.

Add the tail, if you want it curly ask your grown up to do it with some scissors and then stick it on .

That just leaves the whiskers to attach under the nose.

Now you have your mouse, does it have a name?

Quick, make it run up the clock!
